GEDA® REMOTE CONTROL🔊

No more messing with cables!
Discover GEDA's new Remote Control!

The brand new GEDA Remote Control is fully compatible with the renowned GEDA rope hoists and is very easy to install. It can be plugged in as an alternative to current cable pendant controls, even with existing machines. This way, the new control is an easy and quick retrofit solution. The intermediate Remote Control Transmitter box can be clamped to a scaffolding tube. Working on a 30 m radius, the Remote Control allows for decent mobility and opens lots of new possibilities for vertical transport on site.

NEW

- **Wireless Control**

Edition 11/2023/GB

Easy as pie – Plug and Play!

Clamp it on!
Simply clamp the transmitter box to a scaffold pole.

Connect to power!
Power up your transmitter box.

Plug it in!
Plug the rope hoist's power cord (black) into the SCHUKO® socket of the transmitter box. Then, plug in the box's grey cable into the machine socket.

Activate!
To activate the Remote Control, push the start-buttons simultaneously and hold for about 2 seconds.

Play!
The Remote Control is now installed and ready for use!

Anti-theft protection!
After all work is done – protect your device and lock your transmitter box with an optional padlock!
